Property Verification Report

Property Details

Survey Number	TEST78a609
Khata Number	KH567e
State	Karnataka
District	Bangalore Urban

Risk Score: 45/100

Status: RED

Recommendation: HIGH RISK LEGAL REVIEW REQUIRED

Executive Summary

This property presents significant legal risks primarily due to the absence of the crucial sale deed content and a clear Khata number mismatch. While government records indicate no encumbrances or litigation, these findings are based on mock data, severely limiting their reliability. The agricultural status of the land also poses a yellow flag if non-agricultural use is intended. Thorough verification with real government records and procurement of all missing documents are absolutely essential.

Red Flags (Critical Issues)

- Missing Sale Deed Content:** The crucial 'sale_deed' document was uploaded but its content (ocr_text and extracted data) is entirely empty. Without the actual sale deed, it's impossible to verify the legal ownership, sale terms, property description, prior encumbrances mentioned therein, or the proper execution of the transfer from the previous owner to the current owner. This is a fundamental missing piece of information for any title verification.
- Khata Number Mismatch:** The Khata No provided in the property details (KH567e) does not match the Khata No listed in the government records (KH-TES-2024). This discrepancy needs immediate clarification. It could indicate incorrect property identification, an outdated khata in records, or an issue with the search parameters, leading to potential confusion about the specific parcel of land being analyzed.
- Reliance on Mock Government Data:** The government records explicitly state 'MOCK DATA - Real government API integration pending'. This disclaimer fundamentally undermines the reliability of all 'green flags' and positive indicators derived from these records. All conclusions drawn about encumbrances, litigation, and ownership are based on simulated data, not real-time government verification.

Yellow Flags (Caution Required)

- **Agricultural Land - Conversion Status:** The land is classified as 'Agricultural (Bagayat)'. If the intention is to use this land for non-agricultural purposes (e.g., residential, commercial, industrial), a 'DC Conversion' (Diversion of Land for Non-Agricultural Purposes) approval from the Deputy Commissioner is mandatory. Failure to obtain this before conversion of use is illegal and can lead to penalties and demolition. The status of this conversion is unknown.

Green Flags (Positive Indicators)

- **No Recorded Encumbrances:** Government records indicate no registered encumbrances on the property. However, this finding is based on 'MOCK DATA' and cannot be relied upon without real-time verification and a thorough physical inspection of records.
- **No Pending Litigation:** Government records state there is no pending litigation against the property. This is a positive sign, but its reliability is severely limited by the 'MOCK DATA' disclaimer. Actual verification from court records is essential.
- **CERSAI Check Clean:** The CERSAI check indicates no mortgages registered against the property. While positive, the confidence in this finding is low due to the 'MOCK DATA' nature of the government records. A real CERSAI search is required.
- **Mutation Record Available:** A mutation record (MUT-2020-1234, dated 2020-01-15) exists, showing a transfer from 'Previous Owner' to 'Current Owner' (Mock Owner Name). This indicates the change in ownership has been recorded in the land revenue records, which is a necessary step post-sale. However, the details of the underlying sale deed are missing.
